The Indian mathematicians could not bring themselves to the point of admitting that one could not divide by zero. Bhaskara did correctly state other properties of zero, however, such as $0^2 = 0$, and $\sqrt{0} = 0$. Perhaps we should note at this point that there was another civilisation which developed a place-value number system.

Zero Potential Energy. The nature of potential energy is that the zero point is arbitrary; it can be set like the origin of a coordinate system. That is not to say that it is insignificant; once the zero of potential energy is set, then every value of potential energy is measured with respect to that zero. Another way of saying it is that it is.
