1.4 Classical Mutation Theory vs. Neo-Darwinian Evolution. 1.4.1 Mutation. When Hugo de Vries postulated the term mutation, he believed that mutation alone can bring about the abrupt changes of genetic constitution. He divorced evolution from natural selection by maintaining that natural selection merely has the.

PREFACE TO SECOND EDITION. Unexpected postponement of the revision of this text has made it necessary to rewrite it almost entirely. During the nine years that have elapsed since the publication of the first edition, tremendous advances have been made in the fields of both theoretical and applied genetics.

The year 2006 is the 140th anniversary of Mendel's pathbreaking article. It is appropriate that a journal devoted to genetics begin the year with an article about Mendel and his work. Much has been written about his deep insights and the failure of the biological community to recognize his work. Here, on this anniversary,.
